GRANADA CLOSSES FLOW-THROUGH FINANCING

December 1, 2017, Granada Gold Mine (TSX.V: GGM) (“Granada Gold” or the “Company”) is pleased to announce that further to its news release dated November 24, 2017, the Company has closed its non-brokered private placement offering raising gross proceeds of \$700,000. The Company issued 2,000,000 flow-through shares (“FT Shares”) at a price of \$0.35 per FT Share, subject to TSX Venture Exchange (“Exchange”) approval.

Finder’s fees totalling \$63,000 payable in cash and 180,000 broker warrants were paid in connection with the financing. The broker warrants are exercisable at \$0.35 per share for a period of two years from closing. The finder’s fees paid in connection with the private placement are subject to Exchange approval.

The proceeds of the Private Placement will be used for surface exploration, trenching, and historical resampling of drill core on the Company’s Granada Gold Property in Québec.

All securities issued in connection with the private placement are subject to a four month and a day hold period expiring on April 2, 2018, in accordance with applicable Securities Laws.

About Granada Gold Mine Inc.

Granada Gold Mine Inc. is developing the Granada Gold Property near Rouyn-Noranda, Quebec. The property includes the former Granada gold mine which produced more than 50,000 ounces of gold in the 1930’s before a fire destroyed the surface buildings. The highly prolific Cadillac Trend, which has been the source of more than 50 million ounces of gold produced in the past century on a line running from Val-d’Or to Rouyn-Noranda, cuts through the north part of the property.

An updated Mineral Resource Estimate and revised Block Model dated June 30, 2017, with effective date of May 16, 2017, includes the first material estimate of high-grade gold resources discovered in zones at depth immediately north of the LONG Bars Zone open-pit deposit.

An initial Inferred underground resource of **10,386,500** tonnes grading **4.56** g/t Au at a cut-off grade of **1.5** g/t (**1.5** million oz. Au) has been outlined along **600** meters of strike, north of the original near-surface discovery at Granada. Open-pit-constrained resources have **625,000** ounces Measured at **1.14** g/t Au and **182,700** ounces Indicated at **1.26** g/t Au with a cut-off grade of 0.39 g/t Au (**807,700** ounces M&I at **1.16** g/t Au) representing a major increase in Block Model estimates for Granada vs. 2012 Block Model.

The Company has obtained all necessary permits for the initial mining phase known as the “Rolling Start” for which stripping has already begun, and has been conducting exploration drilling in order to expand the reported mineral resource for the property. Additional information is available at www.granadagoldmine.com.
